Direct

Who are we?

Rubber Flooring Direct (RFD) is a South Australian company, established in 2011 through the success of it's sister company TEB Contractors. TEB provide very high standards of quality and workmanship in the construction, resurfacing and repairs of all sporting surfaces.

Rubber Flooring Direct offers premium quality rubber flooring products to the retail and commercial market Australia-wide, with our stock being stored locally at our office & warehouse in Modbury North, South Australia.

At Rubber Flooring Direct, there's a solution for everyone! From rubber pavers, tiles and gym flooring, to rubber mulch, synthetic grass and our coloured SBR granules (wet-pour) that provide a flexible, soft and safe flooring solution. If safety from falls is a concern, we have safe-fall systems designed to cushion the impact of falls - great for schools, day care centers, playgrounds - in fact anywhere that Australian Standards are required, and even for the additional peace of mind around your home. Test certificates for compliance with Australian 'Playground Standards' (AS/NZS 4422:1996) can be provided upon purchase of a safety flooring solution.

'Our goal is to create a safer Australia with the innovation that is Rubber Flooring'.

Our products are manufactured in Malaysia, the largest producer of rubber in the world, by a company dedicated to becoming the leading manufacturer of recycled rubber in the industry. Rubber waste that is destined for landfill (such as scrap tyres and recyclable rubber) is shredded and processed into small granules where rubber-manufacturing experts mix, mould and transform granules into the final rubber products you see at Rubber Flooring Direct.

Our products provide a safe, slip-resistant flooring solution that is cost effective and looks great. Have us quote on the installation, or you can 'Do It Yourself'. We offer free consultations to find the right solution for your requirements and budget.

Delivery is Australia-wide and pick up is available at our showroom & warehouse. For deliveries around metropolitan Adelaide, we provide a fast and cheap local delivery service.

Safety Pavers

Great for the active environment, rubber safety pavers provide protection and resilience in commercial, industrial and recreational areas. They provide sound and shock absorption along with spike and slip resistance to not only help reduce or prevent significant injury, but to provide a comfortable flooring solution everyone can enjoy!

Perfect in areas such as children's playgrounds, pool surrounds, pathways and equine arenas etc., these rubber pavers meet Australian Standards (AS/NZ 4422:1996) for Critical Fall Height, making them ideal in schools, child & aged care facilities and public playgrounds/exercise areas, amongst many others.

They are cost effective, fast and easy to install over existing sand, asphalt or concrete pavements and can be installed inside or out as they are unaffected by weather conditions such as sun, water and extreme temperatures. Have us install them for you, or Do It Yourself.

Product Specification

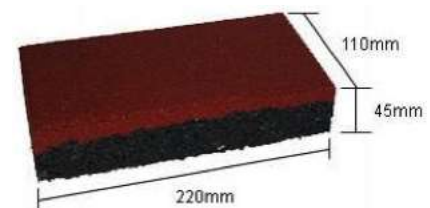

Description: SBR safety recycled rubber paver

Materials: SBR pigmented shredded rubber with rubber granules.

Thickness (mm): 45

Colour: 4 colour standard pigment series.

Dimension: 220mm x 110mm

Benefits:

- Critical fall height 1.35m
- Environmentally friendly
- Low maintenance
- DIY installations
- Suitable for indoor/outdoor
- Anti-Slip

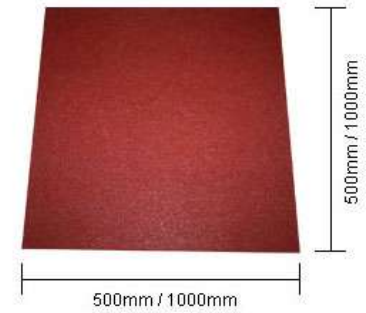

Common Uses:

- Patios
- Driveways
- Pathways
- Equine arenas
- Child play areas
- Pool surrounds

Safety Tile

With much of the same attributes as the safety pavers, the safety tiles also meet Australian Standards (AS/NZ 4422:1996) and are great in larger areas such as playgrounds, equine arenas, veterinary clinics and industrial areas along with smaller areas such as patios, pathways and BBQ areas.

Designed with an anti-slip surface, spike resistance and sound & shock absorption, these tiles are also great in schools, child & aged care facilities and public playgrounds/exercise areas, amongst many others.

Safety Tiles come standard in **Black**. Alternate colours, such as the red tile shown in the diagram, are available on request. Please contact us for availability and pricing.

Product Specification

Description: SBR safety recycled rubber tiles.

Materials: SBR pigmented shredded rubber with rubber granules.

Thickness (mm): 45

Colour: Black

Special Order: 4 colour standard pigment series.

Dimension: 500mm x 500mm

Benefits:

- Critical fall height 1.38m
- Environmentally friendly
- Low maintenance
- DIY Installations
- Suitable for indoor/outdoor
- Anti-Slip

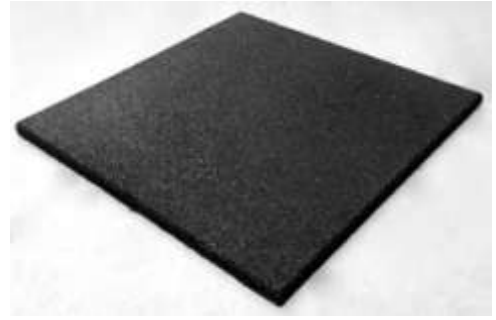

Common Uses:

- Patios
- Driveways
- Pathways
- Horse walkways
- Horse Boxes
- Child play areas
- Pool surrounds
- Commercial use

Commercial Tiles

Commercial tiles are stronger than our standard tiles as the rubber is more compacted and tightly sealed. They are perfect for use under heavy weighted objects or machinery, in workshops, BBQ or entertaining areas (shown in photo), car garages/showrooms and the equine industry to name just a few. They are great for protecting your floors and if you move, pull them up and take them with you!

Product Specification

- Description:** SBR safety recycled rubber commercial tiles.
- Materials:** SBR pigmented shredded rubber with rubber granules.
- Thickness (mm):** 20
- Colour:** Black
- Dimension:** 500mm x 500mm

Benefits:

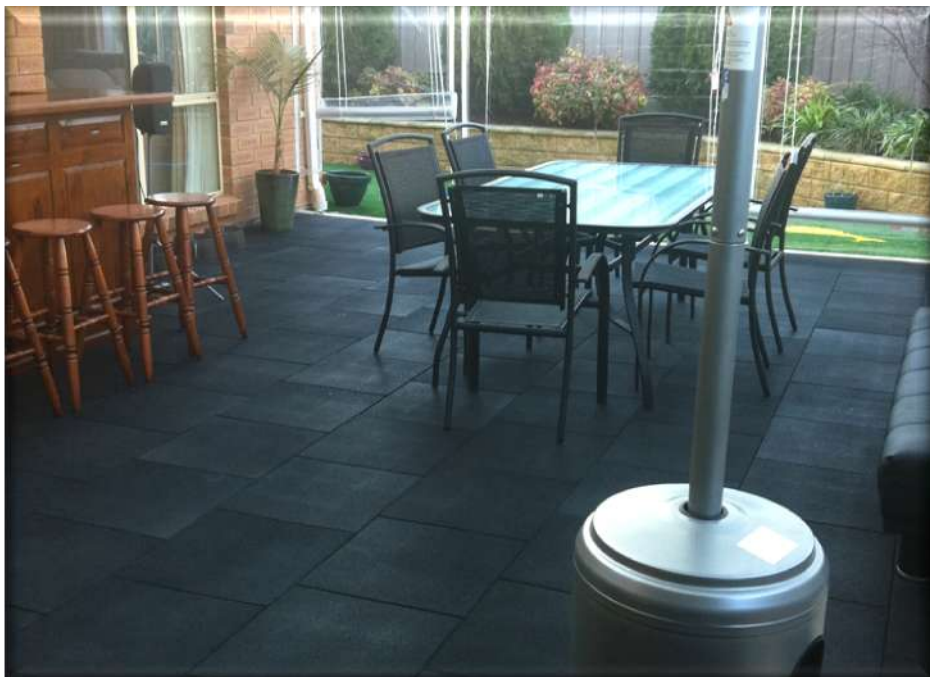

- Critical fall height 1.38m
- Environmentally friendly
- Low maintenance
- DIY Installations
- Commercial tiles have built in strength

Common Uses:

- Patios
- Driveways
- Horse walkways
- Horse Boxes

- Commercial/Industrial use

- Workshops

Gym Tiles

Whilst being designed for the Gym environment, these tiles can be utilised for many applications. They are slip-resistant and shock absorbent, making them an ideal flooring solution for any commercial or home gym, PT studio, sporting clubroom and so on. Gym tiles are a high quality rubber tile designed for the commercial gym market, and are made with bevelled edges to prevent tripping hazards and provide that sophisticated look to any room! They provide a safe flooring solution for many applications – in both the commercial and residential market.

Product Specification

Description:	SBR safety recycled rubber gym tiles
Materials:	SBR pigmented shredded rubber with rubber granules.
Thickness (mm):	15
Colour:	Black
Dimension:	1000mm x 1000 mm
Shape:	Square with bevelled edges.

Benefits:

- 'Do It Yourself' installation
- Quality
- Environmentally friendly
- Low maintenance
- Portability
- Bevelled edging

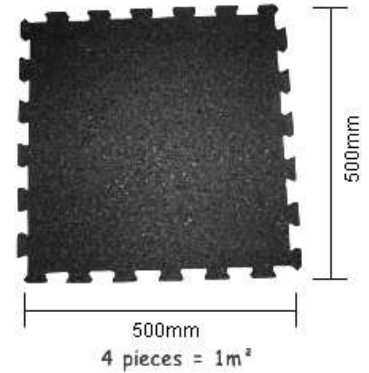

Common Uses:

- Commercial & home gyms
- Martial arts
- Weight & aerobic rooms
- Pro shops & Showrooms
- Exercise/Yoga/Meditation area
- Physiotherapy suites
- Gymnastics flooring
- Nursing homes

Interlocking Mats

This self-interlocking system provides an easy and cost effective installation, best suited for gym floors or portable flooring. Whether it's a home or commercial gym, PT studio, exercise or yoga classroom, these tiles provide excellent value for money. Along with being a high quality rubber tile, these systems allow for easy installation and minimal movement without the use of adhesive thanks to it's interlocking design. Great for the Do It Yourself job and is great if you need to pull it up for relocation.

Product Specification

Description: SBR safety recycled rubber-interlocking tiles.

Materials: SBR pigmented shredded rubber.

Thickness (mm): 10

Colour: Black.

Dimension: 500mm x 500mm

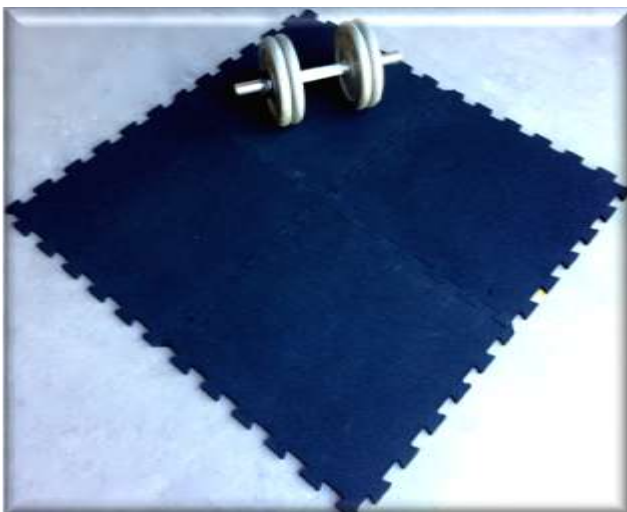

Shape: Square with V-Lock

Benefits:

- Easy self-installation
- Cost effective
- Quality
- Environmentally friendly
- Low maintenance
- Portability

Common Uses:

- Nursing homes
- Physiotherapy suites
- Camp sites
- Work station
- Gym floor
- Exercise area
- Portable flooring
- Pro shops & Showrooms

Rubber Mulch

Rubber mulch from Rubber Flooring Direct is a non-toxic, long lasting, easy install and insect free alternative to your standard wood chip type products used in gardens and playgrounds today. With minimal maintenance and a lifetime of well over 10 years, rubber mulch will save you the time and money of re-mulching your garden regularly – for some that can be multiple times per year!

Rubber mulch does not absorb water like wood chips, instead allowing water through to the soil beneath and retaining it there, helping your garden grow whilst saving water! It will not breed or attract insects such as White Ants, and will not rot, mold or ignite. Great for the replacement of wood chips in children's playgrounds, providing a soft, safe flooring solution without the fear of splinters and feels great with bare feet!

Product Specification

- Description:** SBR safety recycled rubber mulch.
- Materials:** SBR pigmented shredded rubber.
- Colour:** Brown, Terracotta Red and Blue. Other colours are available on request.
- Packaged:** 25kg Bags

Mulch spread Rates (Per 25kg Bag)

<i>Spread Height</i>	<i>Area in Square Meters</i>
20mm	4m ²
40mm	2m ²
60mm	1.33m ²

For example: If you have an area that is 10m² and would like a spread thickness of 20mm then you will require 3 Bags and if you wanted it 40mm thick you will need 5 Bags.

Coloured SBR Granules (Wet-pour Rubber)

Pre-coloured SBR granules, when mixed with Polyurethane (P.U.) binder, provides a safe, seamless and soft anti-slip surface that's great for almost anywhere! Whether it's for getting around those difficult areas such as trees, curved paths and around the pool, to safety playground surfacing for accident prevention/reduction and vandal resistance, the wet pour system has many capabilities and is tailored to suit your requirement.

SBR granules can be installed on most hard surfaces, or on to prepared and compacted bases such as quarry rubble. The standard depth of installation is 15mm, which can be adjusted to suit your requirements. Standard colours are Green, Blue, Red and Yellow, with multiple colours able to be used to create your desired effect.

Also available are our premium EPDM granules, providing a brighter and longer lasting colour, amongst a greater variety of colours available. These are a special order item, please contact us for further details.

Product Specification

Description: SBR safety recycled rubber granules

Materials: SBR pigmented shredded rubber

Colour: Red/Blue/Green/Yellow. Other colours are available on request.

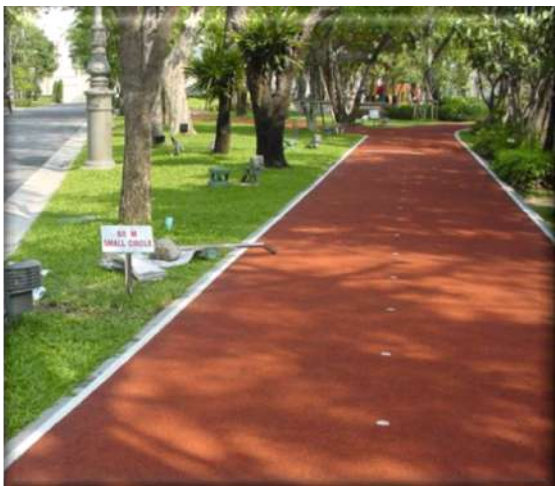

Packaged: 25kg Bags

Rubber Granules Spreading Ratio's:

1 x 25kg Bag will cover approx. 2m²

Rubber: Binder Mixing Ratio:

1 x 25kg Bag with 5 Litres of Binder

P.C. Safe-fall System

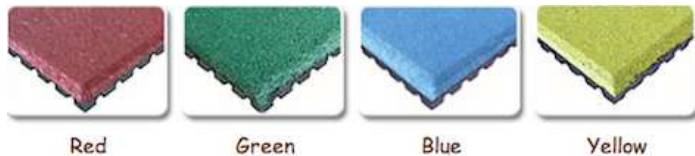

Rubber Flooring Direct's 'P.C. (Pre-Certified) Safe-fall System' is designed not only for a faster and easier installation, but to meet Australian Standards right 'out-of-the-box'. This system eliminates the requirement of having to test each site for Critical Fall Height upon completion, and provides consistency with every installation.

When our 25mm underlay tiles are installed with 15mm of our Coloured SBR or EPDM granules on top (see image), you will have certification to Australian Standards (AS/NZS 4422:1996) for a Critical Fall Height of up to 1.45m. This means the floor height of your equipment may be up to 1.45 metres from the ground.

Product Specification

Description:	Coloured SBR (or EPDM) granules at 15mm depth on 25mm rubber underlay tile.
Materials:	SBR pigmented shredded rubber.
Thickness (mm):	40 (Underlay Tile + EPDM/SBR Granules).
Colour:	4 standard pigment series for the topping. Can be mixed for a multiple colour (i.e. Jazz) finish. More colours are available in the EPDM range. Underlay tiles are black.
Dimension:	500mm x 500mm (Underlay Tile).
Shape:	Square with V-Lock (Underlay Tile).

Synthetic Grass

Installing synthetic grass in your play area is a great way to provide a soft, safe flooring solution which is hard wearing and looks great! With a variety of colours and shapes available, our synthetic grass is a durable and low-maintenance surface that is non-slip and non-toxic. When combined with either our rubber or foam underlay matting, you have a flooring system that is certified to Australian Standards for Critical Fall Heights. Councils, schools and kindergartens Australia-wide use these systems extensively, with varying thickness available dependent on the floor height requirements of the equipment. For the additional educational benefit, and often just for the looks, we have a variety of playshapes available that can be installed to your colour and location request (see picture below).

Product Specification

- Description:** Landscape 19mm.
- Colour:** Gum Tree Green (Standard). Various colours available on request.
- Thickness (mm):** 19

Delivery

Rubber Flooring Direct delivers Australia-wide. We are based in Modbury North and can provide a fast delivery service across South Australia utilising our local drivers and delivery trucks. Pick-ups are also welcome, and our office team is happy to receive all customers that would like to collect their products themselves.

Special orders

There are a vast number of rubber products manufactured with varying designs, shapes and colours available. We are happy to organise special orders if there is a particular product or colour you had in mind, which we don't have in stock. Further colour blends can also be made using our EPDM finish (below image) or Pre-coloured Rubber Granules. Please speak to our sales representative for further information and advice.
